35	Description of Actions to Achieve Compliance	<p>Since August 2012 subject vessel has always used compliant bunkers in the ECA area. Currently no L/SFO available on board. Vsl was fixed to perform a voyage loading from 1st port Brownsville, Texas and 2nd port Houston Hoff. No bunkers available at 1st port but there are available at 2nd port Houston Hoff via the only one supplier Chemoil. Our plan is to bunker at 2nd port and be in compliance upon our arrival or departure. However, recently we had serious quality issues on other ships of the fleet whilst bunkering L/SFO quantities at Houston with some off spec cases where TCP values were not in accordance with ISO specs. Our bunkering of L/SFO fuel will also depend on suppliers' availability of on spec product.</p>	N/A
